Machina

Page-by-Page Product Manual

2026-08-24

Page-by-page guides

Each guide follows: Purpose → When to use it → How to get there → What you can do → Related pages.

Every route is also listed in the [complete page index](#).

Core

Page	What it covers
Capabilities	Capabilities — Machina Core page at <code>/capabilities</code> .
Create VM	Create a new libvirt VM.
Node Devices	Node Devices — Machina Core page at <code>/devices</code> .
Fleet	Fleet — Machina Core page at <code>/fleet</code> .
Dashboard	Host dashboard — VM inventory pulse and shortcuts.
Host SSH	Host SSH — Machina Core page at <code>/host-ssh</code> .
Import VM	Import VM — Machina Core page at <code>/import</code> .
Services	Services — Machina Core page at <code>/services</code> .
Sprites	Instant, disposable sandbox VMs — boot on libvirt/QEMU, Cloud Hypervisor, or Firecracker, TTL-reaped automatically, no persistent state.
Virtual Machines	Virtual machine inventory for this libvirt host.

Fleet Cloud

Page	What it covers
Create Instance	Create Instance — Machina Fleet Cloud page at <code>/fleet-cloud/create</code> .
Flavors	Flavors — Machina Fleet Cloud page at <code>/fleet-cloud/flavors</code> .
Floating IPs	Floating IPs — Machina Fleet Cloud page at <code>/fleet-cloud/floating-ips</code> .
Heat Orchestration	Heat Orchestration — Machina Fleet Cloud page at <code>/fleet-cloud/heat</code> .
Identity	Identity — Machina Fleet Cloud page at <code>/fleet-cloud/identity</code> .
Images	Images — Machina Fleet Cloud page at <code>/fleet-cloud/images</code> .
Instances	Instances — Machina Fleet Cloud page at <code>/fleet-cloud/instances</code> .
Keypairs	Keypairs — Machina Fleet Cloud page at <code>/fleet-cloud/keypairs</code> .
Load Balancers	Load Balancers — Machina Fleet Cloud page at <code>/fleet-cloud/load-balancers</code> .
Migrations	Migrations — Machina Fleet Cloud page at <code>/fleet-cloud/migrations</code> .
Networking	Networking — Machina Fleet Cloud page at <code>/fleet-cloud/networking</code> .
Security Groups	Security Groups — Machina Fleet Cloud page at <code>/fleet-cloud/security-groups</code> .
Server Groups	Server Groups — Machina Fleet Cloud page at <code>/fleet-cloud/server-groups</code> .

Page	What it covers
Network Topology	Network Topology — Machina Fleet Cloud page at /fleet-cloud/topology .
Volume Snapshots	Volume Snapshots — Machina Fleet Cloud page at /fleet-cloud/volume-snapshots .
Volumes	Volumes — Machina Fleet Cloud page at /fleet-cloud/volumes .
Overview	Overview — Machina Fleet Cloud page at /fleet-cloud .

Infrastructure

Page	What it covers
Snapshot Backups	Snapshot Backups — Machina Infrastructure page at /backups .
Disk Images	Disk Images — Machina Infrastructure page at /disk-images .
Host Networking	Host Networking — Machina Infrastructure page at /host-networking .
Networks	Networks — Machina Infrastructure page at /networks .
Network Filters	Network Filters — Machina Infrastructure page at /nwfilters .
Secrets	Secrets — Machina Infrastructure page at /secrets .
Snapshots	Snapshots — Machina Infrastructure page at /snapshots .
Storage Pools	Storage Pools — Machina Infrastructure page at /storage .

Kubernetes

Page	What it covers
Kata + Cloud Hypervisor	Kata + Cloud Hypervisor — Machina Kubernetes page at /k8s/kata .
K8s Workloads	K8s Workloads — Machina Kubernetes page at /k8s/workloads .
Kubernetes	Kubernetes — Machina Kubernetes page at /k8s .

Monitoring

Page	What it covers
Web Sessions	Web Sessions — Machina Monitoring page at /admin/sessions .
Audit Log	Audit Log — Machina Monitoring page at /audit .
Live Metrics	Live Metrics — Machina Monitoring page at /events .
Daemon Jobs	Daemon Jobs — Machina Monitoring page at /jobs .
System Logs	System Logs — Machina Monitoring page at /logs .
Host Overview	Host Overview — Machina Monitoring page at /node .
System Check	System Check — Machina Monitoring page at /system-check .

Platform

Page	What it covers
Activity Monitor	Activity Monitor — Machina Platform page at /platform/activity .
AI Providers	AI Providers — Machina Platform page at /platform/ai-providers .
API Keys	API Keys — Machina Platform page at /platform/api-keys .
Applications	Applications — Machina Platform page at /platform/applications .
Backup & Restore	Backup & Restore — Machina Platform page at /platform/backups .
Bare Metal	Bare Metal — Machina Platform page at /platform/baremetal .
Blueprints	Blueprints — Machina Platform page at /platform/blueprints .
Cloud-Init Studio	Cloud-Init Studio — Machina Platform page at /platform/cloud-init .
Images & ISOs	Images & ISOs — Machina Platform page at /platform/content .
Advanced Create	Advanced Create — Machina Platform page at /platform/create-advanced .
Create ISO	Create ISO — Machina Platform page at /platform/create-iso .
Datacenter View	Datacenter View — Machina Platform page at /platform/datacenter .
Developer Hub	Developer Hub — Machina Platform page at /platform/developer .
Add Host	Add Host — Machina Platform page at /platform/enroll .
Enterprise Features	Enterprise Features — Machina Platform page at /platform/enterprise .
Event Log	Event Log — Machina Platform page at /platform/events .
Fleet Snapshots	Fleet Snapshots — Machina Platform page at /platform/fleet-snapshots .
GPU Command Center	GPU Command Center — Machina Platform page at /platform/gpu .
High Availability	High Availability — Machina Platform page at /platform/ha .
Hosts	Hosts — Machina Platform page at /platform/hosts .
Integrations	Integrations — Machina Platform page at /platform/integrations .
Launchpad	Launchpad — Machina Platform page at /platform/launchpad .
Maintenance	Maintenance — Machina Platform page at /platform/maintenance .
Marketplace	Marketplace — Machina Platform page at /platform/marketplace .
Migration Assistant	Migration Assistant — Machina Platform page at /platform/migration .
Network Canvas	Network Canvas — Machina Platform page at /platform/network-canvas .
Networks	Networks — Machina Platform page at /platform/networks .
Alerts	Alerts — Machina Platform page at /platform/notifications .
Observability	Observability — Machina Platform page at /platform/observability .
Disaster Recovery	Disaster Recovery — Machina Platform page at /platform/placement .
Policy	Policy — Machina Platform page at /platform/policy .
Stage Manager	Stage Manager — Machina Platform page at /platform/projects .

Page	What it covers
Recommendations	Recommendations — Machina Platform page at <code>/platform/recommendations</code> .
Reports	Reports — Machina Platform page at <code>/platform/reports</code> .
Settings	Settings — Machina Platform page at <code>/platform/settings</code> .
Security Operations	Security Operations — Machina Platform page at <code>/platform/soc</code> .
Storage (Atlas)	Storage (Atlas) — Machina Platform page at <code>/platform/storage-atlas</code> .
Storage Tiers	Storage Tiers — Machina Platform page at <code>/platform/storage-tiers</code> .
Disk Utility	Disk Utility — Machina Platform page at <code>/platform/storage</code> .
Support	Support — Machina Platform page at <code>/platform/support</code> .
Tasks	Tasks — Machina Platform page at <code>/platform/tasks</code> .
Templates	Templates — Machina Platform page at <code>/platform/templates</code> .
Topology	Topology — Machina Platform page at <code>/platform/topology</code> .
Upgrade Matrix	Upgrade Matrix — Machina Platform page at <code>/platform/upgrade</code> .
Users & Groups	Users & Groups — Machina Platform page at <code>/platform/users</code> .
VM Builder	VM Builder — Machina Platform page at <code>/platform/vm-builder</code> .
Virtual Machines	Fleet VM finder across enrolled hosts.
Webhooks	Webhooks — Machina Platform page at <code>/platform/webhooks</code> .
Mission Control	Mission Control — multi-host platform overview.

Platform Security

Page	What it covers
Approvals	Approvals — Machina Platform / Security page at <code>/platform/zeus/approvals</code> .
Configure Zeus	Configure Zeus — Machina Platform / Security page at <code>/platform/zeus/configure</code> .
Incident Commander	Incident Commander — Machina Platform / Security page at <code>/platform/zeus/incidents</code> .
Rightsizing	Rightsizing — Machina Platform / Security page at <code>/platform/zeus/rightsizing</code> .
Zeus Security	Zeus Security — Machina Platform / Security page at <code>/platform/zeus/security</code> .
Zeus AI	Zeus AI assistant for Machina operations.

100 guides. Regenerate: `node scripts/customer-docs/generate-guide-index.mjs` .

Capabilities

Purpose

Capabilities — Machina Core page at `/capabilities` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/capabilities`
- Nav: **Core** → **Capabilities** (or spotlight / Finder search)

What you can do

1. Open `/capabilities` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

-

Create VM

Purpose

Create a new libvirt VM.

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/create`
- Nav: **Core** → **Create VM** (or spotlight / Finder search)

What you can do

1. Open `/create` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Node Devices

Purpose

Node Devices — Machina Core page at `/devices`.

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/devices`
- Nav: **Core** → **Node Devices** (or spotlight / Finder search)

What you can do

1. Open `/devices` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Fleet

Purpose

Fleet — Machina Core page at `/fleet` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/fleet`
- Nav: **Core** → **Fleet** (or spotlight / Finder search)

What you can do

1. Open `/fleet` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Dashboard

Purpose

Host dashboard — VM inventory pulse and shortcuts.

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/`
- Nav: **Core** → **Dashboard** (or spotlight / Finder search)

What you can do

1. Open `/` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Host SSH

Purpose

Host SSH — Machina Core page at `/host-ssh` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/host-ssh`
- Nav: **Core** → **Host SSH** (or spotlight / Finder search)

What you can do

1. Open `/host-ssh` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Import VM

Purpose

Import VM — Machina Core page at `/import` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/import`
- Nav: **Core** → **Import VM** (or spotlight / Finder search)

What you can do

1. Open `/import` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Services

Purpose

Services — Machina Core page at `/services` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/services`
- Nav: **Core** → **Services** (or spotlight / Finder search)

What you can do

1. Open `/services` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Sprites

Purpose

Instant, disposable sandbox VMs — boot on libvirt/QEMU, Cloud Hypervisor, or Firecracker, TTL-reaped automatically, no persistent state.

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/sprites`
- Nav: **Core** → **Sprites** (or spotlight / Finder search)

What you can do

1. **New Sprite** — pick a golden image (from the daemon's `/var/lib/machina/sprite-images` registry), size it (vCPUs, memory), set a TTL, and choose a backend: **Libvirt** (default, instant COW clone), **Cloud Hypervisor** (a direct child process of the daemon, no libvirtd in the path — boots off a full disk copy instead, so first boot is slower), or **Firecracker** (also a direct child process — converts the golden image to a raw root filesystem on every boot, so first boot is the slowest of the three, but the resulting microVM has the smallest footprint).
2. **Network egress** (optional, off by default) — attaches the sprite to the host's existing "default" NAT network for outbound internet access. Sprites stay vsock-only otherwise. Shares that network's posture with any regular VM on the host — there's no per-sprite isolation or domain allow-list.
3. The list shows state, backend, vsock CID, network status, and a live expiry countdown. **Delete** tears a sprite down immediately instead of waiting for its TTL; a background reaper does the same automatically once the TTL passes.
4. From the command line: `machinactl sprite <list|get|create|delete|golden-images>` gives the same operations (set `MACHINA_API_TOKEN` for create/delete).

If the page stays empty, check daemon health (`/api/v1/health`) and libvirt connectivity. An empty golden-image picker means no `.qcow2` files are present under `/var/lib/machina/sprite-images` yet.

Virtual Machines

Purpose

Virtual machine inventory for this libvirt host.

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/vms`
- Nav: **Core** → **Virtual Machines** (or spotlight / Finder search)

What you can do

1. Open `/vms` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Create Instance

Purpose

Create Instance — Machina Fleet Cloud page at `/fleet-cloud/create` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/fleet-cloud/create`
- Nav: **Fleet Cloud** → **Create Instance** (or spotlight / Finder search)

What you can do

1. Open `/fleet-cloud/create` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Flavors

Purpose

Flavors — Machina Fleet Cloud page at `/fleet-cloud/flavors` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/fleet-cloud/flavors`
- Nav: **Fleet Cloud** → **Flavors** (or spotlight / Finder search)

What you can do

1. Open `/fleet-cloud/flavors` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Networking

Purpose

Networking — Machina Fleet Cloud page at `/fleet-cloud/networking` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/fleet-cloud/networking`
- Nav: **Fleet Cloud** → **Networking** (or spotlight / Finder search)

What you can do

1. Open `/fleet-cloud/networking` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/platform/api-keys`
- Nav: **Platform** → **API Keys** (or spotlight / Finder search)

What you can do

1. Open `/platform/api-keys` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Stage Manager

Purpose

Stage Manager — Machina Platform page at `/platform/projects` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/platform/projects`
- Nav: **Platform** → **Stage Manager** (or spotlight / Finder search)

What you can do

1. Open `/platform/projects` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Recommendations

Purpose

Recommendations — Machina Platform page at `/platform/recommendations` .

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/platform/recommendations`
- Nav: **Platform** → **Recommendations** (or spotlight / Finder search)

What you can do

1. Open `/platform/recommendations` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Reports

Purpose

Reports — Machina Platform page at `/platform/reports`.

When to use it

- Open this page when the job matches the purpose above
- Use Mission Control (`/platform`) for fleet-wide work; use Core routes for this host only
- Confirm PAM/OIDC login and roles if actions are missing

How to get there

- Route: `/platform/reports`
- Nav: **Platform** → **Reports** (or spotlight / Finder search)

What you can do

1. Open `/platform/reports` against the Machina daemon (`https://<host>:5092`).
2. Use filters and host/VM selectors when the page provides them.
3. Drill into a VM, host, or Fleet Cloud resource for consoles and detail panels.
4. For mutating actions (create/delete VM, apply firewall, Fleet Cloud change): confirm the target host and role (Admin/Operator).

If the page stays empty, check daemon health (`/api/v1/health`), libvirt connectivity, and whether the feature requires Fleet Cloud, HyperSDK, or Launchpad to be enabled.

Platform / Security

Page	Route	Purpose	Guide
Zeus AI	<code>/platform/zeus</code>	Zeus AI assistant for Machina operations.	Open
Configure Zeus	<code>/platform/zeus/configure</code>	Configure Zeus — Machina Platform / Security page at <code>/platform/zeus/configure</code> .	Open
Zeus Security	<code>/platform/zeus/security</code>	Zeus Security — Machina Platform / Security page at <code>/platform/zeus/security</code> .	Open
Incident Commander	<code>/platform/zeus/incidents</code>	Incident Commander — Machina Platform / Security page at <code>/platform/zeus/incidents</code> .	Open
Approvals	<code>/platform/zeus/approvals</code>	Approvals — Machina Platform / Security page at <code>/platform/zeus/approvals</code> .	Open
Rightsizing	<code>/platform/zeus/rightsizing</code>	Rightsizing — Machina Platform / Security page at <code>/platform/zeus/rightsizing</code> .	Open

Infrastructure

Page	Route	Purpose	Guide
Storage Pools	<code>/storage</code>	Storage Pools — Machina Infrastructure page at <code>/storage</code> .	Open
Disk Images	<code>/disk-images</code>	Disk Images — Machina Infrastructure page at <code>/disk-images</code> .	Open
Snapshots	<code>/snapshots</code>	Snapshots — Machina Infrastructure page at <code>/snapshots</code> .	Open
Snapshot Backups	<code>/backups</code>	Snapshot Backups — Machina Infrastructure page at <code>/backups</code> .	Open
Networks	<code>/networks</code>	Networks — Machina Infrastructure page at <code>/networks</code> .	Open
Network Filters	<code>/nwfilters</code>	Network Filters — Machina Infrastructure page at <code>/nwfilters</code> .	Open
Host Networking	<code>/host-networking</code>	Host Networking — Machina Infrastructure page at <code>/host-networking</code> .	Open
Secrets	<code>/secrets</code>	Secrets — Machina Infrastructure page at <code>/secrets</code> .	Open

Kubernetes

Page	Route	Purpose	Guide
Kubernetes	<code>/k8s</code>	Kubernetes — Machina Kubernetes page at <code>/k8s</code> .	Open
K8s Workloads	<code>/k8s/workloads</code>	K8s Workloads — Machina Kubernetes page at <code>/k8s/workloads</code> .	Open
Kata + Cloud Hypervisor	<code>/k8s/kata</code>	Kata + Cloud Hypervisor — Machina Kubernetes page at <code>/k8s/kata</code> .	Open

Fleet Cloud

Page	Route	Purpose	Guide
Overview	<code>/fleet-cloud</code>	Overview — Machina Fleet Cloud page at <code>/fleet-cloud</code> .	Open
Instances	<code>/fleet-cloud/instances</code>	Instances — Machina Fleet Cloud page at <code>/fleet-cloud/instances</code> .	Open
Create Instance	<code>/fleet-cloud/create</code>	Create Instance — Machina Fleet Cloud page at <code>/fleet-cloud/create</code> .	Open
Server Groups	<code>/fleet-cloud/server-groups</code>	Server Groups — Machina Fleet Cloud page at <code>/fleet-cloud/server-groups</code> .	Open
Keypairs	<code>/fleet-cloud/keypairs</code>	Keypairs — Machina Fleet Cloud page at <code>/fleet-cloud/keypairs</code> .	Open
Flavors	<code>/fleet-cloud/flavors</code>	Flavors — Machina Fleet Cloud page at <code>/fleet-cloud/flavors</code> .	Open
Migrations	<code>/fleet-cloud/migrations</code>	Migrations — Machina Fleet Cloud page at <code>/fleet-cloud/migrations</code> .	Open
Volumes	<code>/fleet-cloud/volumes</code>	Volumes — Machina Fleet Cloud page at <code>/fleet-cloud/volumes</code> .	Open
Volume Snapshots	<code>/fleet-cloud/volume-snapshots</code>	Volume Snapshots — Machina Fleet Cloud page at <code>/fleet-cloud/volume-snapshots</code> .	Open
Images	<code>/fleet-cloud/images</code>	Images — Machina Fleet Cloud page at <code>/fleet-cloud/images</code> .	Open
Networking	<code>/fleet-cloud/networking</code>	Networking — Machina Fleet Cloud page at <code>/fleet-cloud/networking</code> .	Open
Security Groups	<code>/fleet-cloud/security-groups</code>	Security Groups — Machina Fleet Cloud page at <code>/fleet-cloud/security-groups</code> .	Open
Floating IPs	<code>/fleet-cloud/floating-ips</code>	Floating IPs — Machina Fleet Cloud page at <code>/fleet-cloud/floating-ips</code> .	Open
Load Balancers	<code>/fleet-cloud/load-balancers</code>	Load Balancers — Machina Fleet Cloud page at <code>/fleet-cloud/load-balancers</code> .	Open
Network Topology	<code>/fleet-cloud/topology</code>	Network Topology — Machina Fleet Cloud page at <code>/fleet-cloud/topology</code> .	Open
Heat Orchestration	<code>/fleet-cloud/heat</code>	Heat Orchestration — Machina Fleet Cloud page at <code>/fleet-cloud/heat</code> .	Open
Identity	<code>/fleet-cloud/identity</code>	Identity — Machina Fleet Cloud page at <code>/fleet-cloud/identity</code> .	Open

Monitoring

Page	Route	Purpose	Guide
Host Overview	<code>/node</code>	Host Overview — Machina Monitoring page at <code>/node</code> .	Open
Live Metrics	<code>/events</code>	Live Metrics — Machina Monitoring page at <code>/events</code> .	Open

Page	Route	Purpose	Guide
System Check	<code>/system-check</code>	System Check — Machina Monitoring page at <code>/system-check</code> .	Open
Daemon Jobs	<code>/jobs</code>	Daemon Jobs — Machina Monitoring page at <code>/jobs</code> .	Open
System Logs	<code>/logs</code>	System Logs — Machina Monitoring page at <code>/logs</code> .	Open
Audit Log	<code>/audit</code>	Audit Log — Machina Monitoring page at <code>/audit</code> .	Open
Web Sessions	<code>/admin/sessions</code>	Web Sessions — Machina Monitoring page at <code>/admin/sessions</code> .	Open
